

PRESS RELEASE MATTEX 2010

9-12 March 2010
Expocentre, Moscow, Russia

Facts & Figures 2010

International specialized exhibition MATTEX for water-, heating-, gas supply and sanitary technologies organized by EUROEXPO exhibition company took place from March 9th-12th 2010.

The Exposition occupied a net area of 8 900 sqm, accommodating 165 exhibitors and attracting 9 835 visitors from Russia and other countries.

Since 2010 MATTEX is held parallel to CLIMATE WORLD exhibition – the unique Russian trade fair specialized in air conditioning, ventilation, refrigeration. Together MATTEX and Climate World exhibitions presented the whole HVAC platform for Russian distributors and international producers.

Professional visitor's audience consisted of construction engineers, plumbers, building and designing companies, local distributors, wholesalers, retailers, producers and suppliers.

All Russian and international key players were gathered under one umbrella, herewith providing a high quality trade platform for HVAC and sanitary engineering. Among exhibitors were such local and international companies as ESPA GROUP, FONDITAL, FRIGOTECH, GAZMASH, HELIOTHERM, INTERMA, ITT LOWARA/ VOGEL PUMPEN, MAZUR, PEDROLLO, RUSKLIMAT, TESTO RUS, VESSEL, VESTA TRADING, WALRAVEN, WAVIN EKOPLASTIK, WEDA, WELL PUMPS, ZHEMCHUZHINA etc.

Official Support from Russian government as well as local and international associations

MATTEX gained support from leading Russian and international associations, such as „ROSTEPLO“, „AVOK NORTH WEST“, „POLYMERIC PIPELINE SYSTEMS, AIRAL (International Aluminium Radiators Association), Russian specialized magazine AQUATHERM etc.

At exhibition's official opening Mr. Marshev, the chairman of Russian United Coordinating Council on Building, welcomed all MATTEX participants and visitors. According to Mr. Marshev MATTEX is today the most interesting and the most important event in Russia for every specialist in engineering market.

The general director of „ROSTEPLO“ Mr. Polivanov wished all exhibitors to find reliable partners. Mr. Novickij, the deputy of Moscow City Duma and the representative of „Edinaja Rossija“ fraction welcomed as well all exhibitors and emphasized that today it's very important to provide all houses with qualitative equipment for water-, gas-, and heating supply. „I believe that all industry specialists will have a good opportunity to discuss current market issues and present latest technologies during MATTEX“, said Mr. Novickij.

PRESS RELEASE MATTEX 2010

Face-to-face networking conference is a key to experience exchange

A varied parallel program which ran parallel to the exhibition was dedicated to the following topics: heating, water sewage, water supply, water treatment, alternative energy sources and many other topics. One of the main topics of this year was renewable energy sources. The conference was organized by "YUZHGEOTEPLLO" and attracted a lot of experts, who discussed RES Development in Russia, energy efficiency, solar and wind-power engineering etc. Among speakers were „YUZHGEOTEPLLO“, WindTec Systems AG, TiSUN, Research Centre VINDEK, WOLF, Kommit-Jug“, Russian-German Energetic Agency (Rudea) and many other.

Among other conference speakers were non-profit consortium AIRAL, who together with Prof. Marchesi from Milan Polytechnical University made an informative speech on technical requirements for radiators and convectors.

Company ESPA, one of the international leaders among producers of pumping equipment, organized this year a seminar where they showed how effectively and on maximum level could be reduced energy consumption using pumping equipment of ESPA, demonstrated new range of circulation pumps which meet all specter of consumers' demand.

At MATTEX 2010 was organized also the so called "job & contact centre". Everyone who was looking for jobs or new business partners was able to leave their contacts, which were afterwards exchanged.

In 2011 MATTEX will be held as always in the traditional exhibition venue Expocentre from March 1st-4th.
